Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/22/07 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 1-6 and 8-18 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-6 and 8-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Arango (US 5,732,078).

5. In regard to claims 1 and 14, Arango disclosed:

identifying, by a routing device, a first one message of a first plurality of messages, said first plurality of messages having at least one first routing treatment in common; column 11, lines 2-5

recording said first routing treatment, the routing treatment comprising switching information that determines an output port for switching packets, wherein said step of recording

Art Unit: 2145

comprises building an entry in a flow cache, the routing device generating an accounting record for the first message and determining an encryption treatment for the first message; column 11, lines 15-55

identifying a second one message of said first plurality of messages; column 11, lines 53-55

routing said second one message responsive to said first routing treatment. Column 11, lines 53-55

6. In regard to claim 2, Arango disclosed:

said first one message comprises a packet; column 11, line 4

said first plurality of messages comprises a stream of packets associated with a selected source device and a selected destination device. Column 11, lines 4-5

7. In regard to claim 3, Arango disclosed:

said stream of packets is associated with a first selected port number at said source device and a second selected port number at said destination device. Inherent to the establishment of a routed packet stream. A router connects to another router via a port on each router. The designation of a connection between the two routers implies the use of the two ports.

8. In regard to claim 4, Arango disclosed:

said first plurality of messages comprises a message flow. Communication session in column 11, line 5

9. In regard to claim 5, Arango disclosed:

said first plurality of messages comprises an ordered sequence, and said first one message has a selected portion in said ordered sequence. All TCP/IP packets are numbered.

10. In regard to claim 6, Arango disclosed:

said first plurality of messages comprises a stream of messages between a selected pair of transport access points. Column 11, line 5

11. In regard to claim 8, Arango disclosed:

Art Unit: 2145

identifying a message of a second plurality of messages, said second plurality of messages having at least one second routing treatment in common, said second routing treatment differing from said first routing treatment. Column 11, lines 53-55

12. In regard to claims 9 and 15, Arango disclosed:

said routing treatment comprises access control information for said first one message.

Column 11, lines 15-23

13. In regard to claims 10 and 16, Arango disclosed:

said routing treatment comprises a destination output port for routing said first one message. A router connects to another router via a port on each router. The designation of a connection between the two routers implies the use of the two ports

14. In regard to claims 11 and 17, Arango disclosed:

recording information about said first plurality of messages; and

transmitting said information to at least one selected device on said network. This is the use of routing tables. See column 12, lines 15-52

15. In regard to claims 12 and 18, Arango disclosed:

a transmission time for an initial one message in said plurality of messages;

a transmission time for a most recent one message in said plurality of messages;

a cumulative count of bytes in said plurality of messages; or

a cumulative count of said one messages in said plurality of messages. Column 11, line 13 requires the use of a time stamp for either an initial message or a most recent message since the communication session is "time-sensitive."

16. In regard to claim 13, Arango disclosed:

receiving said information at said selected device on said network;

recording said information in a database at said selected device; and

making said information available to a second device on said network. Column 12, lines

20-25

Conclusion
